LOS COLORES DEL CARACOL

Help is just a phone call away....

As many Caracol residents head north for the summer, the association is continuing to address issues on the hill. Continued progress is being made on the new Caracol entrance. The phone line and internet service is operational at the caseta. Several video cameras are now in place. The previous entrance gates and electronics are being reinstalled, but only the exit side gate will be in operation once finished. Five residents are helping to subsidize the cost of the new entrance guards, so we plan on keeping them indefinitely at the incoming gate.

If you would like to help your neighborhood you too can directly support the security at the entrance or just bring them a coke or cookie. If you need assistance or want to report suspicious persons, parties out of control, etc, call the caseta at **226-1040**. The guards are on duty 24/7 and will call the police for you.

Preliminary work has begun on the area where the new wall will be to the West of entrance. Debris is being removed and blocks for the wall construction are being brought to the location.

New tags for the cars entering the Caracol have been prepared and are shown above. They will indicate to the guards if the vehicle is a Resident, Rental, or Maintenance worker. Ask the entrance guard for a tag as you pass through. Day visitors will be given temporary cardboard placards to place on their dashboards.

On Wednesday, March 9, 40 volunteers and donors organized by Tom and Mary Reed pulled together to complete the neighborhood cleanup. Accomplishments included: Cleaning, priming and painting the upper water pila and lower waste station, land waste cleanup at 6 locations, tear down and removal of the old caseta, dog waste pickup, and the start of repainting electrical poles. Close to 12 ton of waste was removed to the dump!
